Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, Claim 1-11,15-16 are drawn to a **tested electronic device**, classified in class 257, subclass 678+.

Group II, Claims 12-14 are drawn to a **method of making a tested electronic device**, classified in class 438, subclass 106+.

Inventions II and I are related as process of making and devices for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be used to make other and materially different devices or hand (2) that the devices as claimed can be used to practice another and materially different process. (MPEP § 806.05(f)). In the instance case unpatentabilities of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by the processes materially different from those of the group II invention.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2818

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
